than had been expected in view of the pronounced weakness developed by our market vesterday, and the call here
this morning was quite steady, with prices I point lower
to I point higher. Following the opening there was a
general advance of 162 points on covering by parties who
had yesterday oversold themselves; the movement was
facilitated by light foreign buying. Lery scon, however,
the market turned easier and declined 324 points from
the top prices under a disposition to liquidate, in view of
the generally favorable tenor of crop and weather news,
from which it was learned that pianting was well under
way in Southern localities (in some sections completed),
while for the central and more northerly territories preparatory work was progressing rapidly under excellent
climatic conditions. At the same time reports reaching
here from Southern spot markets indicated a more or less
general disposition to unload supplies of actual cotton,
while spot buyers were inclined to retreat. Local sentiment became decidedly hearish, but selling was not active,
being checked in view of the recent considerable decline
and also by a fear that crop data was yet too meagre
for a definite course of action. Gradually the market
became quieter, and during the afternoon the local contingent had the situation pretty much to themselves. At
sno time during the session, however, was there any broad
speculative interest. No further news of consequence
was received at this point regarding the labor situation
in New-Empland, which has recently been reported to
threaten some trouble through a dissatisfaction regarding
wases. The market turned steadler near the end of the
day on a fair demand from shorts. The close was steady
at net unchanged prices to 3 points higher.

The range of contract prices in the local market to-day
was as follows:
